How does the Safe Shelter Collaborative work?

A survivor contacts a sheltering agency

An agency logs in to the Safe Shelter Collaborative to find shelter for a client.

To find shelter, the agency sends one request to many agencies in the region.

Shelters in the region respond quickly.

A "maybe" response triggers the agencies to call and discuss client details and determine if this is a fit.

If an agency uses hotels or motels for emergency shelter, they place the client.

The agency sends a request to supporters to pay for the cost of the hotel or motel stay.

A supporter with the SafeNight app installed on their phone receives the notification and makes a tax-deductible donation.
